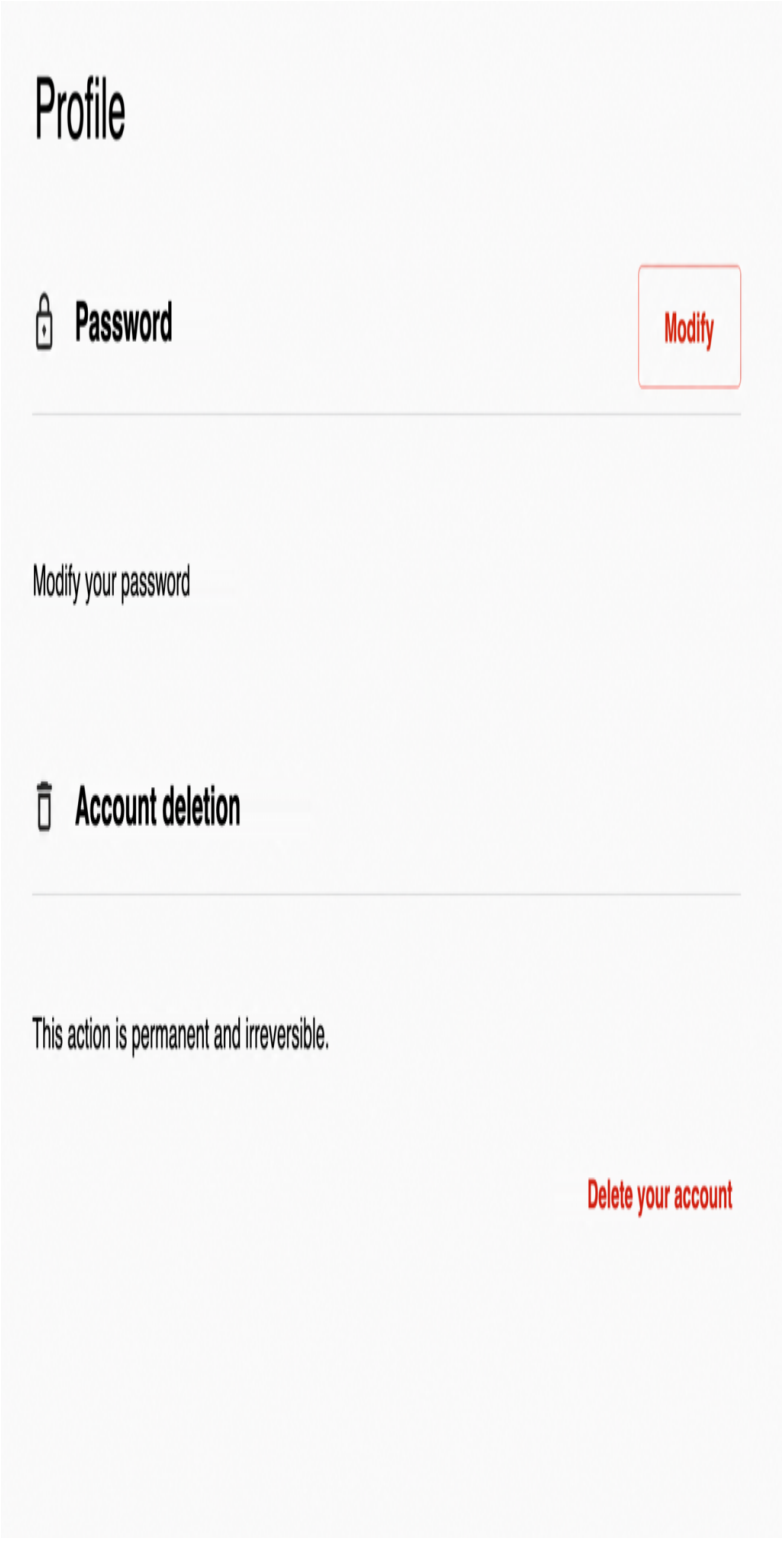
Change your password from your profile

Posted on July 2, 2026 by Smaheine

You can change your password directly from your user profile if you are already logged in to Archipad.

Archipad

Change your password from your profile



1. Open your **user profile** from the application menu.

2. Go to the **Change password** section.
3. Enter your current password, then your new password.
4. Click **Save**.

Choose a secure password. We recommend using a password manager to enhance your account security.
