

# 1-Discover Archipad

Posted on May 21, 2026 by Smaheine

## **Archipad, the dedicated solution for construction site monitoring and coordination**

Archipad is a software solution designed for building, construction and renovation professionals. It facilitates operational project management and collaboration between the field and the office, by centralizing all essential construction site information.

With Archipad, teams improve their efficiency in work coordination, progress tracking and communication between stakeholders, whether on site or in the office.

---

### **Who is Archipad for?**

Archipad is designed for all construction site stakeholders who need to structure, monitor and coordinate their operations.

It is notably used by:

- Real estate developers
- Architects
- Site supervisors
- Project managers
- General contractors
- Craftspeople...

It addresses the following needs:

- Coordination of teams and stakeholders on site
- Real-time progress tracking
- Punch list and non-conformity management
- Centralization of plans, site reports and construction site documents
- Improved communication between project management, engineering offices

and contractors

---

### Why choose Archipad?

- **Simplified site monitoring:** real-time visualization of work progress and site status
  - **Punch list management:** identification, tracking and resolution of items to be corrected directly on site
  - **Field and office collaboration:** instant information sharing among all stakeholders
  - **Construction site data centralization:** consolidation of plans, photos, site reports and annotations
  - **Multi-device access:** use on mobile, tablet and desktop
- 

### Availability and compatibility

- **iOS** (iPhone, iPad)
- **Android** (tablets)
- **Web** (access from any browser)
- **MacOS** (dedicated application)

Supported languages: French, English, Spanish, German, Italian.
