

Create and Publish a Form Definition with DigitForm

Posted on September 4, 2026 by Smaheine

Available on

-  Archipad Web

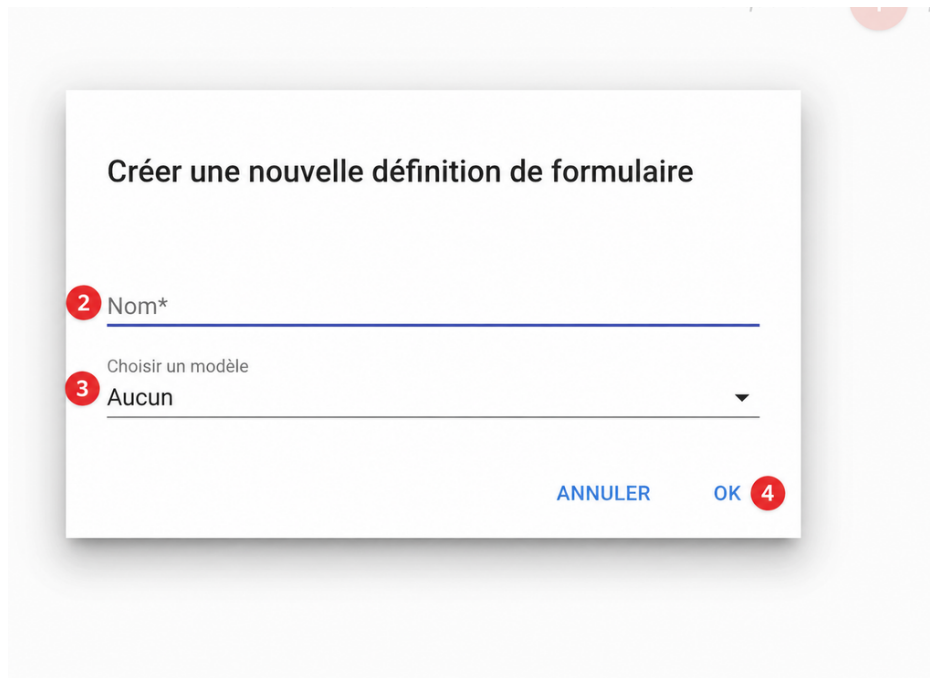

A Form definition contains the Fields and layout that will be used to create your DigitForm Forms.

Create a Form definition

1. Open your Project in Archipad Web.
2. Go to **DigitForm**.
3. Select the **Definition** tab.
4. Click **+ Form definition**.

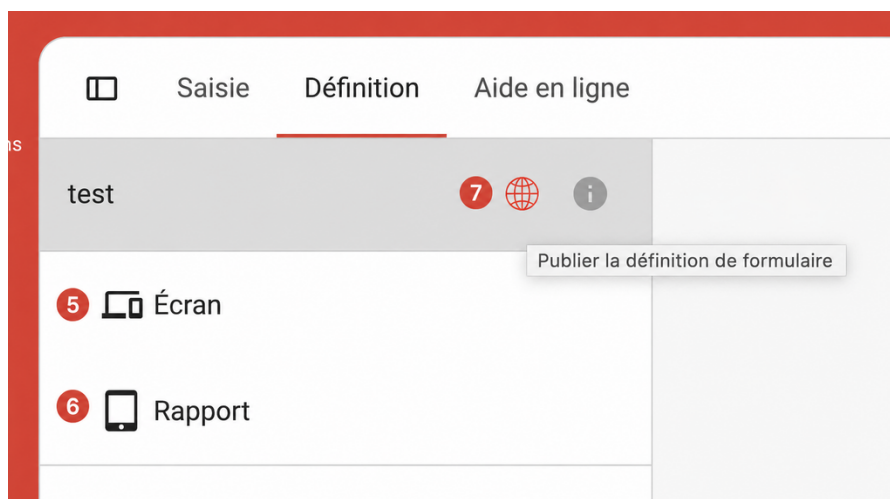

5. Enter the name of the Definition.
6. Select a Template or choose **None** to start with a blank Form.
7. Click **Done**.

Configure and Publish the Definition

1. Select **Screen** to organize the Fields that will be displayed during Input.
2. Select **Report** to configure the PDF document layout.
3. Click the globe icon to Publish the Definition.

Good to know

The Definition must be Published in order to be used when creating a Form.
