

Migrate from Archipad Classic to Archipad™

Posted on September 25, 2026 by Smaheine

Migration from Classic to Archipad

Archipad Classic will no longer be updated soon. To find your Projects and data in Archipad™, follow these four steps.

1. **Request a callback.** In Archipad Classic, tap **Contact** and complete the [contact form](#). A member of our sales team will call you to arrange the transfer of your license. You can continue working in Archipad Classic while you wait.
2. **Start the migration.** Before you begin, make sure Archipad™ Premium is already downloaded on your device, your Archipad™ account is ready, and your license is applied to it. Then Open Archipad Classic and tap **Migrate**. Wait while your data is being prepared.
3. **Open Archipad™.** When the message **“Open Archipad™ to complete the migration”** appears, tap **Open**.

4. **Sign in to Archipad™**. Your data recovery will start automatically. Wait until the operation is complete.
5. If there is insufficient disk space during the migration, free up the amount indicated and tap **Retry**.

If you do not want to migrate now

In the first message, tap **Later** to continue using Archipad Classic. The message will reappear the next time you open it.
