The “Remarks” page with AI in Archipad

Posted on April 1, 2026 by Smaheine

Available on

- **Archipad Web**
- **Android** *(same steps as the Web version)*

The **Remarks** page lets you create, Modify and manage your remarks easily. AI integration enhances your descriptions to shorten, Expand or automatically translate them.

Quick creation and editing

- **New remark:** the **details panel** opens automatically so you can enter your first remark.
- **Existing remarks:** you can Modify the text directly from the page, without opening the details panel.
- **Details panel:** accessible and closable via the button in the top right.

AI functions

Shorten or Expand

- Click **AI → Shorten** or **Expand** to adjust the length of a description.

Automatic translation

- Translate a remark into the **Project language**.
- The AI button is disabled if the remark is empty.

Format preserved

- Checklists and styles remain intact when using AI functions.

Styles and display

- Styles applied from your tablet are synchronized with Archipad Web.
- Bold, underlined or colored text? AI respects them.
- Remarks are displayed correctly in Reports.

Saving and synchronization

- Changes are saved **automatically after synchronization**.
- Unsynchronized remarks remain available if you navigate to other menus.
