

The “Remarks” Page with AI in Archipad

Posted on April 1, 2026 by Smaheine

The **Remarks** page allows you to create, modify and manage your remarks easily. **AI** integration enriches your descriptions by shortening, expanding or automatically translating them.

Quick creation and editing

- **New remark:** the **details panel** opens automatically so you can enter your first remark.
 - **Existing remarks:** you can edit the text directly from the page, without opening the details panel.
 - **Details panel:** accessible and closable via the button in the top right.
-

AI Functions

Shorten or expand

- Click **AI → Shorten** or **Expand** to adjust the length of a description.

Automatic translation

- Translate a remark into the **project language**.

- The AI button is disabled if the remark is empty.

Format preserved

- Checklists and styles remain intact when using AI functions.
-

Styles and display

- Styles applied from your tablet are synchronized with Archipad Web.
 - Bold, underlined or colored text? AI respects them.
 - Observations are correctly displayed in reports.
-

Saving and synchronization

- Changes are saved **automatically after synchronization**.
- Unsynchronized remarks remain available if you navigate to other menus.
