

View and filter remarks from a project

Posted on August 7, 2026 by Smaheine

View all remarks from your project and use filters to quickly find the ones you need.

Available on:  **Archipad Web only**

View all project observations

The screenshot shows the Archipad interface with a red header bar. On the left is a sidebar with icons for Information, Plans, Scheduling, Visits, Observations, and Remarks. The main area displays a list of remarks. A filter menu is open over the list, showing options: Status: In progress, Completed today (2), Visits: All, Statuses: All, Assigned to: All, and Clear filters. The 'Remark' details panel on the right shows fields for Description (RA - 05/08), Chapter, Subchapter, and Assigned to. To the right of the main interface is a sidebar titled 'Available filters' with four options: Status (Filter remarks by their status.), Visits (Filter remarks by one or more visits.), Statuses (Filter remarks by status.), and Assigned to (Filter remarks by assigned person.). At the bottom of the main interface is a 'Clear filters' button with a circular arrow icon and the text 'Click to reset and display all remarks.'

1. Open the project in question.
2. In the main menu, click on **remarks**
3. All project observations are displayed, regardless of which site visits they are associated with.

Filter remarks

From **Remarks**, click on the **Filters** icon.

You can filter the list according to several criteria. To return to all remarks, click on **Clear filters**.

View remarks from a specific site visit

If you want to view only remarks related to **a specific site visit**, open the visit in question directly, then access its remarks.

To know

The **remarks** menu allows you to view observations at the project level, without having to open a site visit.
